Gloves for Handling Pesticides

Due to PPE shortage during the current COVID-19 crisis, DPR has compiled

some glove-safety tips.

If you use reusable gloves, they must be same material as label-required disposable gloves.

Chemical resistant gloves must be <u>at least 14 mil thick</u>[†], so substitute for thicker gloves of the same material.

[†] except laminate and polyethylene gloves

Caring for Reusable Gloves

- 1. Inspect your gloves before putting them on. *Never wear damaged chemical resistant gloves*!
- 2. Wash your hands with soap and water before you put them on.
- 3. Wear your gloves as required by label or regulation when performing handler tasks.
- 4. Wash your gloved hands with soap and water before removing gloves.
- 5. Dry and store your clean gloves away from pesticides, in a cool dry place, and away from direct sunlight.
- 6. After removing gloves, wash your hands with soap and water.

Do not touch contaminated gloves with bare hands!

Be sure to follow 3 CCR 6738. For more information go to: https://www.cdpr.ca.gov/docs/whs/ind_hygiene_ppe.htm
