Camille

I believe we should move forward, especially knowing we have a good weather window, and the lifting on May 1st is not certain. Plus if we get a storm in early May it will not have time to install the storm drain in time.

Hi Neil,

With the current dry weather and possible lifting of the SIP by the first week of May, we are thinking that construction of permanent drainage facilities may not be as necessary. Lets keeping watching the weather and news of the SIP. In the meantime, please require the applicant to maintain, replace, and add erosion control measures as needed.

Thanks

Morning Camille

Do you have any updates?

Thanks
