---

Hi Camille,

I conducted my weekly site inspection at Highland Estates yesterday. Overall things looked great! The only issue noted was that there were a few gas cans and generators that had been taken out of the secondary containment at Lots 9/10. I discussed this with Bob, and he informed the carpenters onsite that they needed to keep their gas cans and generators inside of secondary containment.

Attached is my inspection report from this week. Please let me know if you have any questions!

Thanks so much,

**Jessie Henderson-McBean**

Hi Bob!

It was nice to see you onsite yesterday. Thank you for addressing all of my action items from last week. The site looked great! The only issue identified, which we discussed, was storing all gas cans and generators within secondary containment. Please continue to remind sub-contractors that come to the site to store all potentially hazardous materials within secondary containment.

I hope you have a great weekend!
